Hammad Farooq Meer

Address: Kotli Loharan West Sialkot, Pakistan Email: hammad24197@gmail.com
Mobile: +92 309 6154 169

Professional Summary

Ambitious **MERN stack developer** with a passion for building fast, secure web applications. Skilled in full-stack development, modern UI/UX, and API integration. Strong in **React.js** and **secure authentication** using **JWT**. Always learning, always improving ready to bring fresh ideas to a dynamic team through an exciting internship opportunity.

Work Experience

MERN STACK DEVELOPMENT

Self-directed Learning and Project Experience

- 1. Dedicated significant time in learning data structures and algorithms concepts through online courses, tutorials, and personal projects.
- 2. Developed some different website clones using React, JS, HTML, CSS demonstrating proficiency in algorithm design and implementation.
- 3. Created some different projects using different languages and frameworks for Self-directed Learning and Project Experience

Professional Education

Bachelor of Science in Information Technology From the University of Sialkot, Pakistan (2021-2025)

Projects

Traveller | Social Networking Website (Github)

- 1. Developed a social media application using the **MERN stack** (MongoDB, Express.js, React.js, Node.js).
- 2. Utilized **Redux Toolkit** for efficient state management across the app.
- 3. Key features include:
 - a. User posts with **captions**.
 - b. **User interactions** such as likes and follows.
 - c. Viewing and editing **user profiles**.
- 4. Implemented **JWT** (**JSON Web Token**) for secure user authentication.

Foodie | Fully responsive web application for purchasing Fresh Groceries (Github)

- 1. Built with the **MERN Stack** (MongoDB, Express.js, React.js, Node.js).
- 2. Used **React.js** and **Vite.js** for improved performance.

- 3. Switched from **Ant Design** to **Tailwind CSS** for a seamless, responsive UI.
- 4. Leveraged **Redux Toolkit** for efficient state handling.
- 5. Utilized **Multer** to securely store images on the server.
- 6. Payments:
 - a. Integrated **Stripe** (in test mode) for payment verification.

Key Skills

- 1. Full-Stack Development (MERN)
- 2. State Management (Redux Toolkit)
- 3. UI/UX Development (React.js, Tailwind CSS)
- 4. API Integration (Fetch API, Axios, MongoDB)
- 5. Authentication & Security (JWT)
- 6. Payment Integration (Stripe)
